

THE HOLOCAUST HANDBOOK SERIES

This ambitious, growing series addresses various angles of the “Holocaust” of the WWII era. Most of them are based on decades of research from archives all over the world. They are heavily footnoted and referenced. In contrast to most other works on this issue, the tomes of this series approach its topic with profound academic scrutiny and a critical attitude. Any Holocaust researcher ignoring this series will remain oblivious to some of the most important research in the field. These books are designed to both convince the common reader as well as academics. Library discounts are available for the whole set and all subsequent volumes. The following books have appeared so far and are available from THE BARNES REVIEW:

SECTION ONE:

General Overviews of the Holocaust

The First Holocaust. Jewish Fundraising Campaigns With Holocaust Claims During and After World War One. By Don Heddeshheimer. Don Heddeshheimer's compact but substantive *First Holocaust* documents post-WWI propaganda that claimed East European Jewry was on the brink of annihilation. And the magic number was 6 million then as well. The book details how these Jewish fundraising operations in America raised vast sums in the name of feeding suffering Poles and Russians but actually funneled much of the money to Zionist and Communist groups. Softcover, second edition, 142 pages, B&W illustrations, bibliography, index, #386, **\$15**.

Lectures on the Holocaust. Controversial Issues Cross Examined—updated and revised Second Edition. By Germar Rudolf. Between 1992 and 2005 German scholar Germar Rudolf lectured to various audiences about the Holocaust in the light of new findings. Rudolf's sometimes astounding facts and arguments fell on fertile soil among his listeners, as they were presented in a very sensitive and scholarly way. This book is the literary version of Rudolf's lectures, enriched with the most recent findings of historiography. Rudolf introduces the most important arguments for his findings, and his audience reacts with supportive, skeptical and also hostile questions. We believe this book is the best introduction into this taboo topic. Softcover, second edition, 566 pages, B&W illustrations, bibliography, index, #538, **\$30**.

The Hoax of the Twentieth Century. By Arthur R. Butz. With this book Dr. Butz, Professor of Electrical Engineering and Computer Science, was the first writer to analyze the entire Holocaust complex from a precise scientific manner. This book exhibits the overwhelming force of historical and logical arguments which modern scholars had accumulated by the middle of the 1970s. It was the first book published in the U.S. which won for this field of research the academic dignity to which it is entitled. It continues to be a major historical reference work, frequently cited by prominent personalities. This new edition comes with several supplements adding new information gathered by the author over the last 25 years. It is a “must read” for every historian and every newcomer to the issue who wants to learn about the arguments contained within. Softcover, third edition, 506 pages, B&W illustrations, bibliography, index, #385, **\$30**.

Pictured above are the scientific volumes that comprise the TBR HOLOCAUST HANDBOOK SERIES published thus far.

Dissecting the Holocaust. The Growing Critique of 'Truth' and 'Memory.' Edited by Germar Rudolf. *Dissecting the Holocaust* applies state-of-the-art scientific technique and classic methods of detection to investigate the alleged murder of millions of Jews by Germans during World War II. In 22 contributions—each of 30 pages—the 17 authors dissect generally accepted paradigms of the “Holocaust.” It reads as exciting as a crime novel: so many lies, forgeries and deceptions by politicians, historians and scientists are proven. This is the intellectual adventure of the 21st century. Be part of it! “There is at present no other single volume that provides a serious reader with a broad understanding of the contemporary state of historical issues that influential people would rather not have examined.” —Prof. Dr. A. R. Butz, Evanston, IL. “Revisionism has done away with the exterminationist case.” —Andrew Gray. Second revised edition. Softcover, 616 pages, illustrations, bibliography, index, #219, **\$30**.

The Leuchter Reports: Critical Edition. By Fred Leuchter, Robert Faurisson and Germar Rudolf. Between 1988 and 1991, U.S. expert on execution technologies Fred Leuchter wrote four detailed reports addressing whether the Third Reich operated homicidal gas chambers. The first report on Auschwitz and Majdanek became world famous. Based on chemical analyses and various technical arguments, Leuchter concluded that the locations investigated “could not have then been, or now, be utilized or seriously considered to function as execution gas chambers.” Softcover, 227 pages, B&W illustrations, #431, **\$22**.

The Giant With Feet of Clay: Raul Hilberg and His Standard Work on the "Holocaust." By Juergen Graf. Raul Hilberg's major work *The Destruction of European Jewry* is generally considered the standard work on the Holocaust. The critical reader might ask: what evidence does Hilberg provide to back his thesis that there was a German plan to exterminate Jews, to be carried out in gas chambers? And what evidence supports his estimate of 5.1 million Jewish victims? Juergen Graf applies the methods of critical analysis to Hilberg's evidence and examines the results in light of modern historiography. The results of Graf's critical analysis are devastating for Hilberg. Softcover, 128 pages, B&W illustrations, bibliography, index, #252, \$11.

Jewish Emigration from the Third Reich. By Ingrid Weckert. Current historical writings about the Third Reich paint a bleak picture regarding its treatment of Jewish citizens. The truth is that the emigration was welcomed and supported by the German authorities. Weckert's booklet elucidates the emigration process in law and policy. Softcover, 72 pages, index, #539, \$8.

SECTION TWO: Books on Specific Camps

Treblinka: Extermination Camp or Transit Camp? By Carlo Mattogno and Juergen Graf. It is alleged that at Treblinka in East Poland between 700,000 and 3,000,000 persons were murdered in 1942 and 1943. The weapons used were said to have been stationary and/or mobile gas chambers, fast-acting or slow-acting poison gas, unslaked lime, superheated steam, electricity, diesel exhaust fumes etc. Holocaust historians alleged that bodies were piled as high as multi-storied buildings and burned without a trace, using little or no fuel at all. Graf and Mattogno have now analyzed the origins, logic and technical feasibility of the official version of Treblinka. On the basis of numerous documents they reveal Treblinka's true identity as a mere transit camp. Softcover, 365 pages, B&W illustrations, bibliography, index, #389, \$25.

Chelmno: A German Camp in History & Propaganda. Here, the world's premier holocaust scholar, Carlo Mattogno, focuses his microscope on the death camp located in Poland. It was at Chelmno that huge masses of prisoners—as many as 1.3 million—were allegedly rounded up and killed. His book challenges the conventional wisdom of what went on inside Chelmno. Eyewitness statements, forensics reports, coroners' reports, excavations, crematoria, building plans, U.S. reports, German documents, evacuation efforts, mobile gas vans for homicidal purposes—all are discussed. Softcover, 191 pages, indexed, illustrated, bibliography, appendices, #615, \$20.

The Gas Vans: A Critical Investigation. (A perfect companion to the Chelmno book.) By Santiago Alvarez and Pierre Marais. It is alleged that the Nazis used mobile gas chambers to exterminate 700,000 people. Up until 2011, no thorough monograph had appeared on the topic. Santiago Alvarez has remedied the situation. Are witness statements reliable? Are documents genuine? Where are the murder weapons? Could they have operated as claimed? Where are the corpses? Al-

varez has scrutinized all known wartime documents, photos and witness statements on this topic, and has examined the claims made by the mainstream. Softcover, 390 pages, B&W illustrations, bibliography, index, #607, \$25.

Sobibor: Holocaust Propaganda and Reality. By Juergen Graf, Thomas Kues and Carlo Mattogno. Between 25,000 and 2 million Jews are said to have been killed in gas chambers in the Sobibór camp in Poland. The corpses were allegedly buried in mass graves and later incinerated on pyres. This book investigates these claims and shows that they are based on the selective use of contradictory eyewitness testimony. Archeological surveys of the camp in 2000-2001 are analyzed, with fatal results for the extermination camp hypothesis. The book also documents the general National Socialist policy toward Jews, which never included a genocidal "final solution." Softcover, 434 pages, B&W illustrations, bibliography, index. #536, \$25.

Belzec in Propaganda, Testimonies, Archeological Research and History. By Carlo Mattogno. Witnesses report that between 600,000 and 3 million Jews were murdered in the Belzec camp, located in Poland. Various murder weapons are claimed to have been used: diesel gas; unslaked lime in trains; high voltage; vacuum chambers; etc. The corpses were incinerated on huge pyres without leaving a trace. For those who know the stories about Treblinka this sounds familiar. Thus the author has restricted this study to the aspects which are new compared to Treblinka. In contrast to Treblinka, forensic drillings and excavations were performed at Belzec, the results of which are critically reviewed. Softcover, 138 pages, B&W illustrations, bibliography, index, #540, \$15.

Concentration Camp Stutthof and its Function in National Socialist Jewish Policy. By Carlo Mattogno and Juergen Graf. The concentration camp at Stutthof in Prussia has never before been scientifically investigated by Western historians—until now. Second edition, 128 pages, B&W illustrations, bibliography, index, #379, \$15.

Concentration Camp Majdanek. By Carlo Mattogno and Juergen Graf. Little research had been directed toward concentration camp Majdanek in central Poland, even though it is claimed that up to a million Jews were murdered there. The only information available is discredited Polish Communist propaganda. This glaring research gap has finally been filled. After exhaustive research of primary sources, Mattogno and Graf created a monumental study which expertly dissects and repudiates the myth of homicidal gas chambers at Majdanek. They also critically investigated the legendary mass executions of Jews in tank trenches ("Operation Harvest Festival") and prove them groundless. The authors' investigations lead to unambiguous conclusions about the camp which are radically different from the official theses. Again they have produced a standard and methodical investigative work, which authentic historiography cannot ignore. Softcover, third edition, 350 pages, B&W illustrations, bibliography, index, #380, \$25.

Auschwitz: The Case for Sanity—a two-volume set

A Historical & Technical Study. By Carlo Mattogno. Prof. Robert van Pelt is considered one of the best mainstream experts on Auschwitz and has been called upon several times in holocaust court cases. His work is cited by many to prove the holocaust happened as mainstream scholars insist. This book is a scholarly response to Prof. van Pelt—and Jean-Claude Pressac. It shows that their studies are heavily flawed. This is a book of prime political and scholarly importance! 2 vols. (370 pages + 390 pages), softcover, B&W illustrations, glossary, bibliography, index. #551, \$45. Add \$25 for a sturdy leatherette case to house the two volumes of extreme importance to those looking for the truth about Auschwitz.

SECTION THREE: Books on Auschwitz

Auschwitz: Plain Facts—A Response to Jean-Claude Pressac. Edited by Gernar Rudolf. French pharmacist Jean-Claude Pressac tried to refute recent findings with their own technical methods. For this he was praised by the mainstream, and they proclaimed victory over the “revisionists.” In *Auschwitz: Plain Facts*, Pressac’s works and claims are debunked. Softcover, 197 pages, B&W illustrations, bibliography, index, #542, \$20.

The Rudolf Report. Expert Report on Chemical and Technical Aspects of the ‘Gas Chambers’ of Auschwitz—Expanded and revised edition. By Gernar Rudolf and Dr. Wolfgang Lambrecht. In 1988, execution expert Fred Leuchter investigated the gas chambers of Auschwitz and Majdanek and concluded that they could not have worked as claimed. Ever since, Leuchter’s work has been attacked. In 1993, Gernar Rudolf published a thorough forensic study about the “gas chambers” of Auschwitz. His report irons out the deficiencies of “The Leuchter Report.” Softcover, second edition, 457 pages, B&W illustrations, bibliography, index, #378, \$33.

Auschwitz Lies: Legends, Lies and Prejudices on the Holocaust. By Carlo Mattogno and Gernar Rudolf. The fallacious research and alleged “refutation” of Revisionist scholars by French biochemist G. Wellers, Polish Prof. J. Markiewicz, chemist Dr. Richard Green, Profs. Zimmerman, M. Shermer and A. Grobman, as well as researchers Keren, McCarthy and Mazal, are exposed for what they are: blatant and easily exposed political lies created to ostracize dissident historians. In this book, facts beat propaganda once again. Softcover, second edition, 398 pages, B&W illustrations, index, #541, \$25.

Auschwitz: The Central Construction Office. By Carlo Mattogno. Based upon mostly unpublished German wartime documents, this study describes the history, organization, tasks and procedures of the Central Construction Office of the Waffen-SS and Auschwitz Police. Despite a huge public interest in the camp, next to nothing was really known about this office, which was responsible for the planning and construction of the Auschwitz camp complex, including “the gas chambers.” Softcover, 182 pages, B&W illustrations, glossary, #545, \$18.

Special Treatment in Auschwitz: Origin and Meaning of a Term. By Carlo Mattogno. When appearing in German wartime documents, terms like “special treatment,” “special action,” and others have been interpreted as code words for mass murder. The author proves this is not true. Softcover, 151 pages, B&W illustrations, bibliography, index, #543, \$15.

The Bunkers of Auschwitz: Black Propaganda vs. History. By Carlo Mattogno. The bunkers at Auschwitz are claimed to have been the first homicidal gas chambers at Auschwitz specifically equipped for this purpose. With the help of original German wartime files, this study shows that these “bunkers” never existed, how the rumors about them evolved as black propaganda created by resistance groups in the camp, how this propaganda was transformed into a false reality. Softcover, 264 pages, illustrations, bibliography, index, #544, \$20.

Auschwitz: The First Gassing—Rumor and Reality. Second edition. By Carlo Mattogno. The first gassing in Auschwitz is claimed to have occurred on Sept. 3, 1941, in a basement room. The accounts reporting it are the archetypes for all later gassing accounts. This study analyzes all available sources about this alleged event. It shows that these sources contradict each other in location, date, preparations, victims etc, rendering it impossible to extract a consistent story. Original wartime documents inflict a final blow. Softcover, second edition, 168 pages, B&W illustrations, bibliography, index, #515, \$16.

Auschwitz: Crematorium I and the Alleged Homicidal Gassings. By Carlo Mattogno. The morgue of Crematorium I in Auschwitz is said to be the first homicidal gas chamber there. This study investigates all statements by witnesses and analyzes hundreds of wartime documents to accurately write a history of that building. Mattogno proves that its morgue was never a homicidal gas chamber, nor could it have worked. Softcover, 138 pages, B&W illustrations, bibliography, index, #546, \$18.

Auschwitz: Open Air Incinerations. By Carlo Mattogno. Hundreds of thousands of corpses of murder victims are claimed to have been incinerated in deep ditches in the Auschwitz concentration camp. This book examines the many testimonies regarding these incinerations and establishes whether these claims were even possible. Using aerial photographs, physical evidence and wartime documents, the author shows that these claims are fiction. A must read. Softcover, 132 pages, B&W illustrations, bibliography, index, #547, \$12.
